MATERIALS

Opulent Marble

Kitchen, embodying the uniqueness of marble motifs. The countertop is made of natural stone, the lower facades are made - of brass. The upper milled facades with brass inserts add uniqueness to the design. The accent island divides the space into zones for work and rest. The main material of the island is milled natural marble, combined with brass inserts.

Wood[®]
Systems

Nephritis

Master kitchen, created on an individual project and with careful consideration of details. The upper facades are made of painted matte MDF, the lower ones are made of European walnut veneer. The island of natural stone is successfully combined with copper decor elements. The showcase is assembled from a bronze mirror for the back wall and glass for the front.

Carved Harmony

A project implemented in Germany, created by individual order of the Ukrainian design studio from the best natural materials.

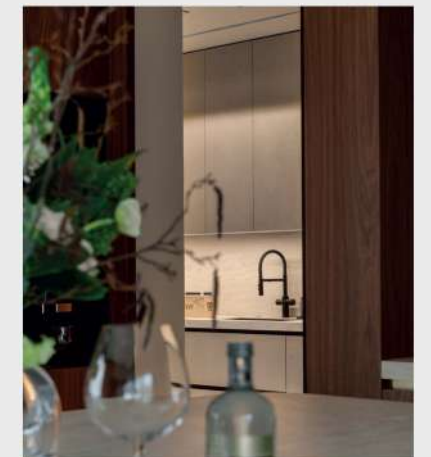

The highlight of the kitchen is a handmade island with a complex geometric shape, carved from Indonesian marble Infinity Brown and decorated with brass structures. The facade part is silk matte MDF coating. A built-in refrigerator, doors, shelves and columns are hidden behind oak veneer facades with metal trim.

The project has a separate coffee zone with an integrated design of aluminum shelves, and a system for supplying boiling water, cold, and soda water.

Fusion Duo

Master-kitchen

Project-embodiment of harmony between chef-kitchen and master-kitchen. Master-kitchen - the kitchen is created with attention to wooden details. The facades are made of American walnut veneer. The central element is an island with a stone countertop. The base is made of carved wood and brass support. Shelves and lockers are also decorated with brass elements that create a harmonious combination of project accents.

Wood[®]
Systems

Chef-kitchen

Chef-kitchen embodies a minimalist design, marked by clean lines and light tones. The facades are made of laminated matte MDF, which is combined in color with travertine. For convenience, the countertop has an integrated backlight. Here, simplicity prevails, ensuring maximum efficiency and ease of use.

Eucalyptica

A project of interesting design solutions. Facades harmoniously combine among themselves: one part is made of eucalyptus veneer and decorated with brass inserts, and the other - is completely made of brass. Unusual geometric shapes of the island are created with the help of manual stone processing. Warm lower lighting and brass trim combine dark material with the overall interior of the room.

Wood[®]
Systems

Grotto

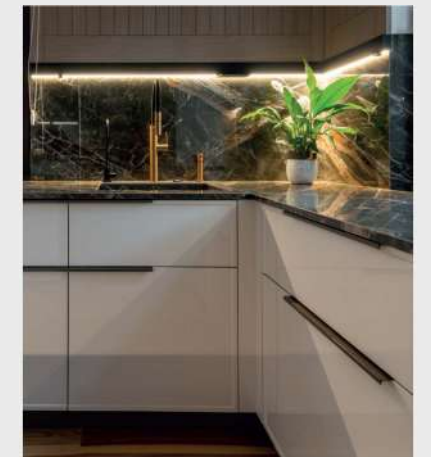

Master kitchen with an exquisite combination of marble, leather, and metal accents. The island is made of milled massif, which is decorated with brass rods and a leather casing. The worktop and elements of the working surface are made of natural marble, and handmade handles are made of stainless elements and are interconnected using titanium nitride coating.

Wood[®]
Systems

Gent Wooden

The kitchen is made in a combination of wooden and stone accents. The glass showcase is decorated with lighting in each compartment, and the back walls are made of natural wood veneer. The facades are made of painted MDF and wooden elements. The island of porcelain stoneware is equipped with the Ossicolor system and is divided into working and recreation areas, which makes it the central element of the room.

Wood[®]
Systems

Wooden Vine

This is a project about the culture of wine storage. High shelves made of natural wood are carved specifically for storing collection bottles. Shelves are decorated with illumination and glass elements. The wine room is elegantly combined with an equipped seating area and creates an ideal atmosphere for enjoying exquisite wines anywhere in the world.

Wood[®]
Systems

Marmo Duo

Master-kitchen

A unique project that combines sophisticated master-kitchen and functional chef-kitchen. The Master-kitchen is created in stone accents. The worktop of the working area and the island, made in natural marble, successfully shades the gray color on the milled-painted facades. There are custom accents from non-ferrous metals on the hood, showcases are made of natural walnut veneer and glass elements.

Wood[®]
Systems

Chef-kitchen

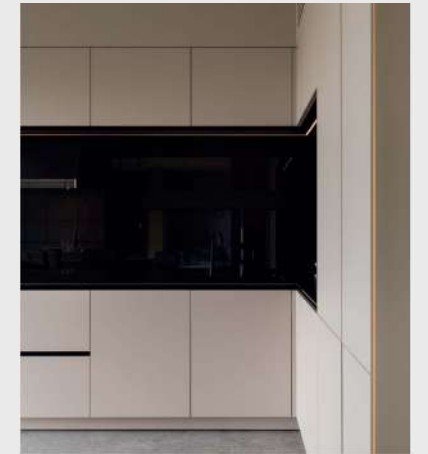

Chef-kitchen is pealized in marble with special attention to functionality. Each cabinet is equipped with lighting and space for placing kitchen appliances, which creates ideal conditions for work. The facades are made of painted MDF, the shelves are decorated with veneer of natural wood.

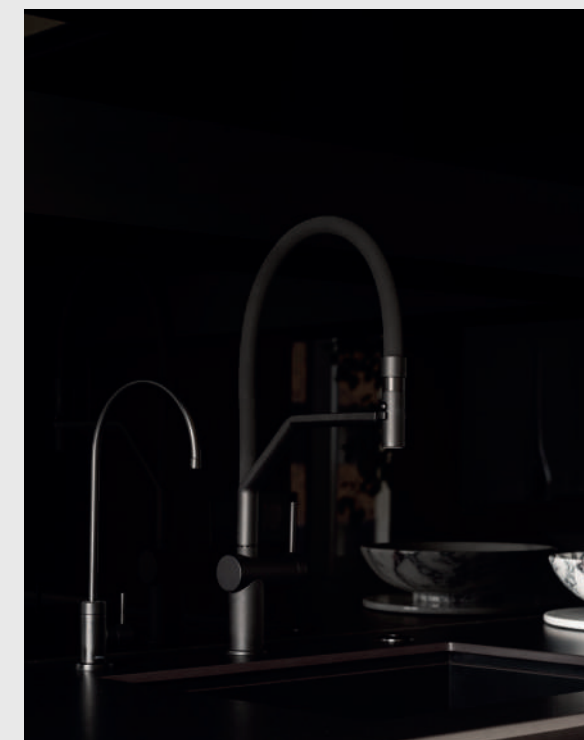

Wood Systems[®]

Airy Elegance

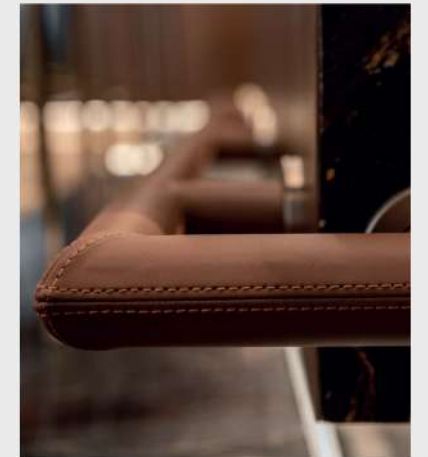

The Master kitchen was created by Ukrainian designer Anna Pivovar. This project is about a harmonious combination of facades of painted MDF, glass, and stone elements of the countertop. Built-in lighting gives practicality to the work, and the island, made of stone, becomes the accent of the room.

Wood[®]
Systems

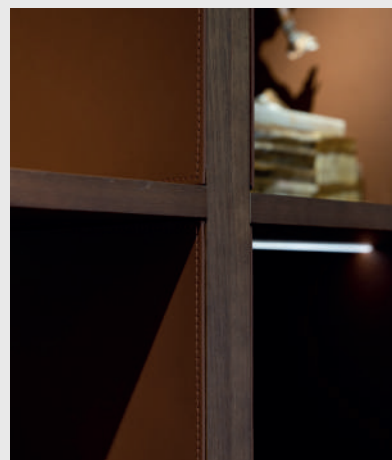

Majestic Marble

The author's project of an elegant space in which every detail is thought out to the smallest detail. The island is made of marble Magma black. Elements of natural wood veneer combined with inserts of stitched leather. The combination of materials is successfully emphasized by lighting elements on the countertop and display cases.

Wood[®]
Systems

Gilded Grove

Master-kitchen

The design project is not limited to the kitchen, it also covers the arrangement of the living room and bathroom. The Master kitchen is created in a tree with metal accents, which are present in the arrangement of the recreation area and dining room. The facades in the kitchen are made of textured American walnut veneer and decorated with brass twigs. The island is carved from porcelain stoneware and framed by lighting. The working and tea areas of the kitchen are hidden behind the facades of the Pocket Doors system.

Wood[®]
Systems

Dinning & TV space

In the living room, there is a brass panel and showcases made of natural wood veneer. The fireplace carved from onyx is the central element of the room and is combined in shades with a metal panel.

The facades in the dining room are made of brass and decorated with various handles, and the windows in the cabinets are backlit.

Washbasins in the bath are carved from natural marble of dark and light shades.

Serene Space

The kitchen embodies style and functionality. A ceramic granite island, decorated with Alcantara and illumination around the perimeter, is the central element of the design. A sliding system for shelves is built into the combined facades of painted and milled MDF. The kitchen is decorated with brass and aluminum handmade details and glass showcases.

Dawning Gallery

A project whose main idea was to harmoniously combine space and natural light. Elements of brass and glass are used to emphasize the ease of the room. An island with a built-in sink, closed shelves and glass shelves harmoniously separates the kitchen, providing an opportunity to effectively use work areas and recreation areas.

Wood[®]
Systems

Chalet Woodland

The kitchen is equipped on the second floor of the chalet. The main part of the project is made of wood, and stone and glass accents add sophistication. Combined facades: made of smooth MDF and natural wood veneer. The accent island is equipped with a corner showcase for storing wine. The island table top and working area are carved from natural marble. Also in the work area are Ossicolor organizers and metal holders for glasses.

Wood[®]
Systems

Copperstone

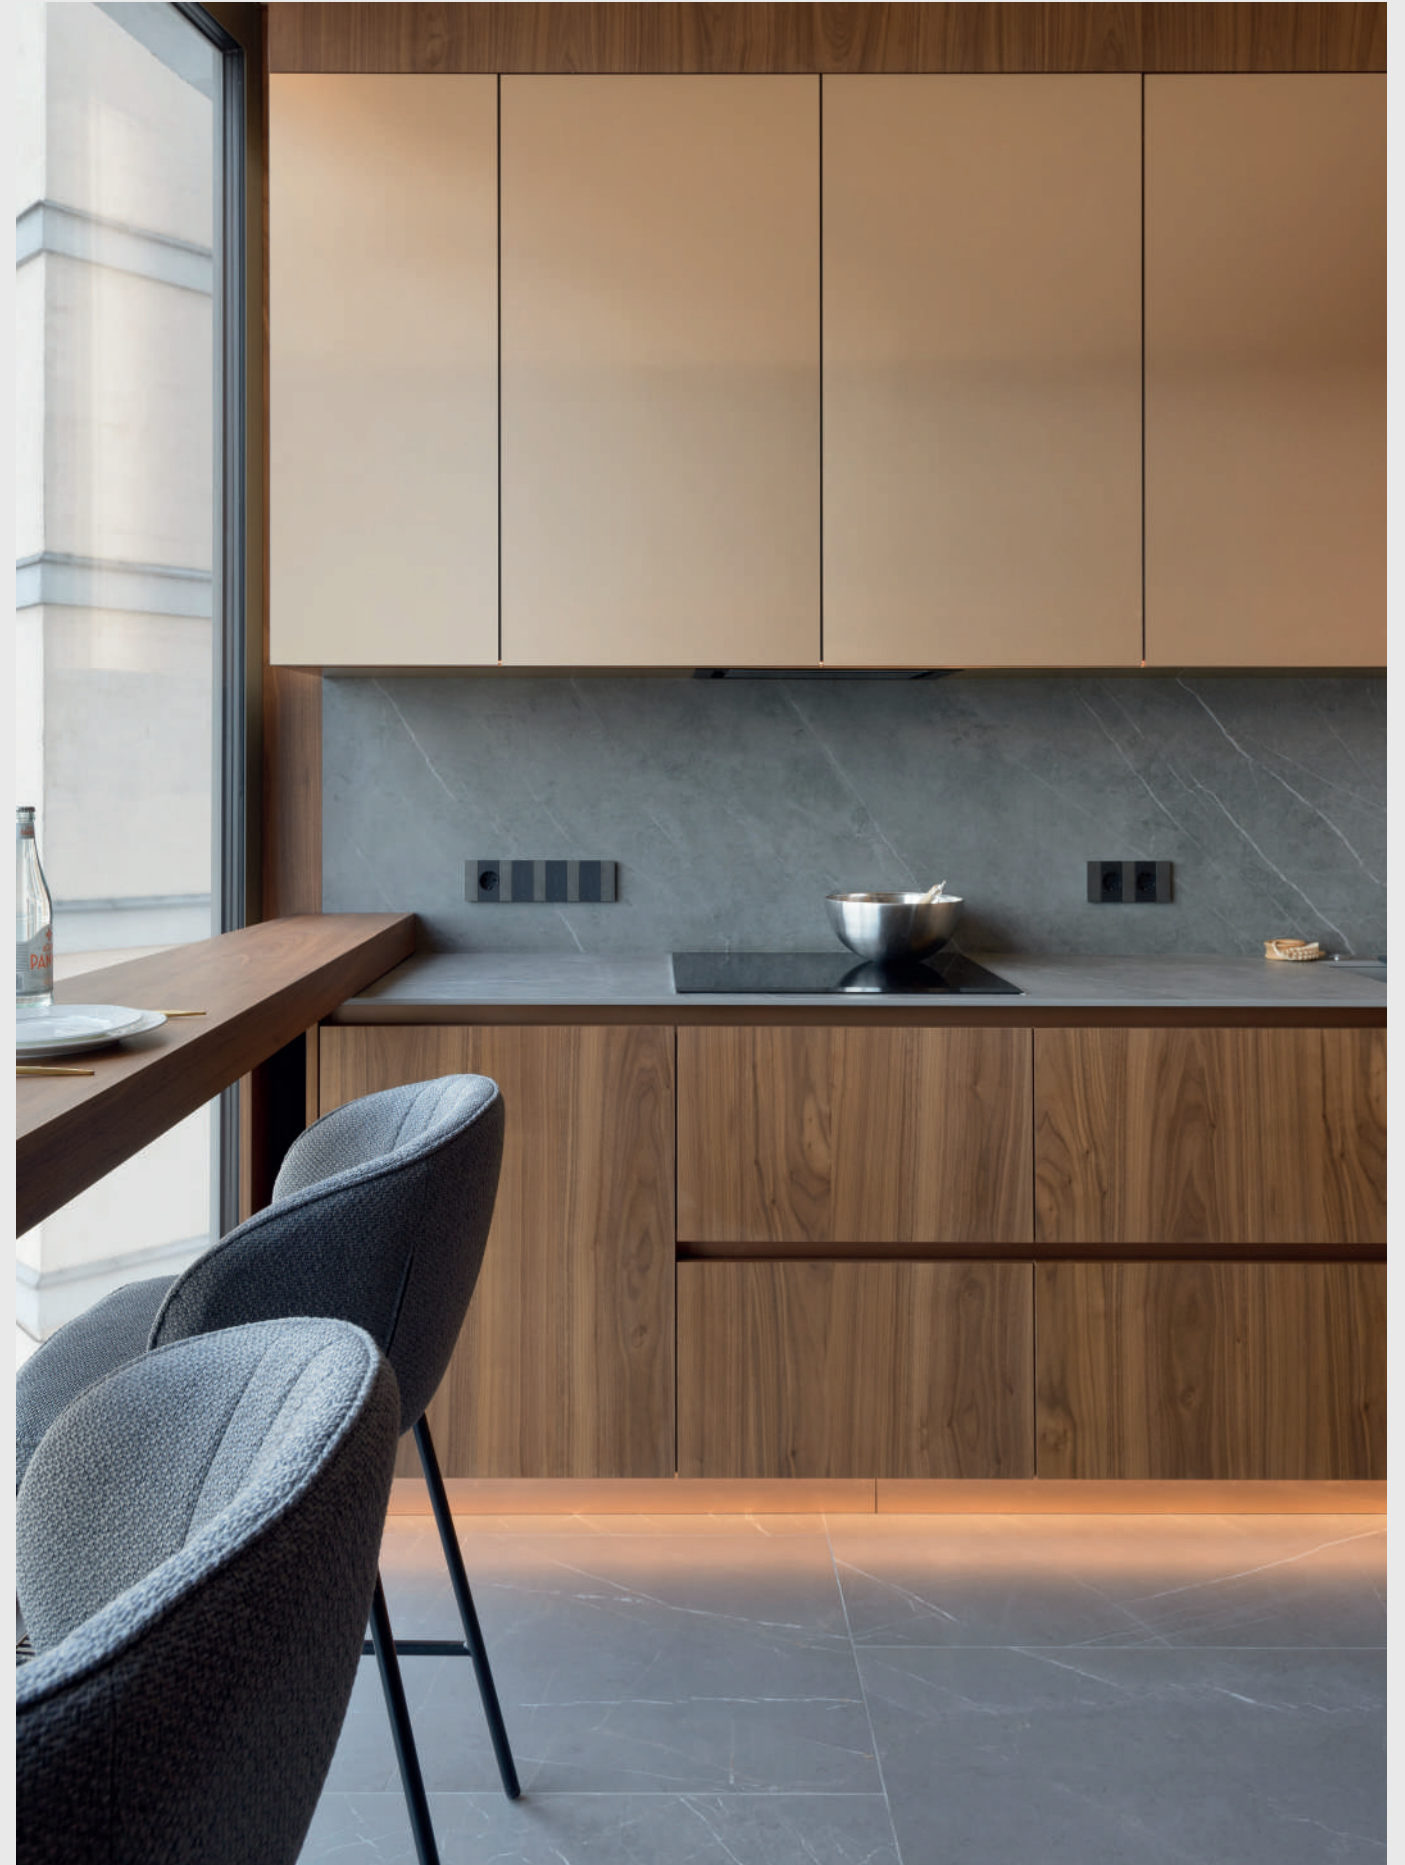

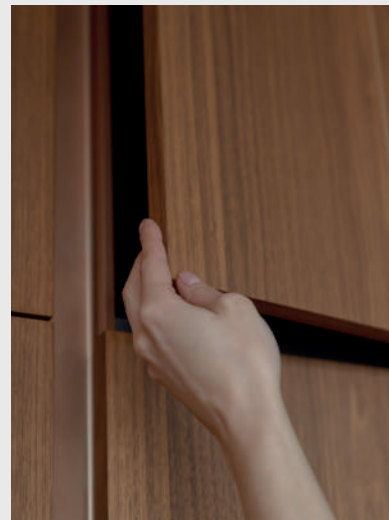

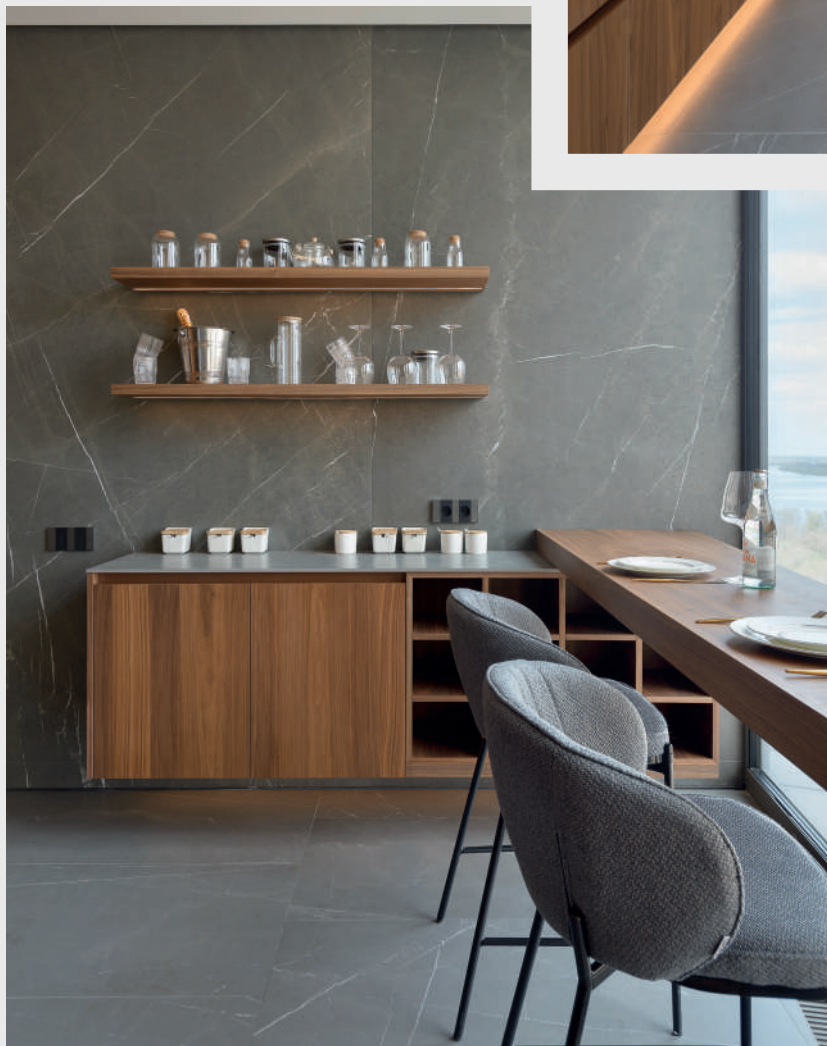

Master-kitchen

Minimalistic space diluted with copper and stone accents. In this work, the tree is used As the main material for the manufacture of veneered facades. In the working area, there are stone elements, combined with copper upper facades.

Wood[®]
Systems

TV zone

The kitchen smoothly turns into a recreation area, which is made of natural wood, and diluted with stone and copper accents. The color palette, which plays with natural shades and the warm shine of metal elements, emphasizes the lightness and airiness of the project.

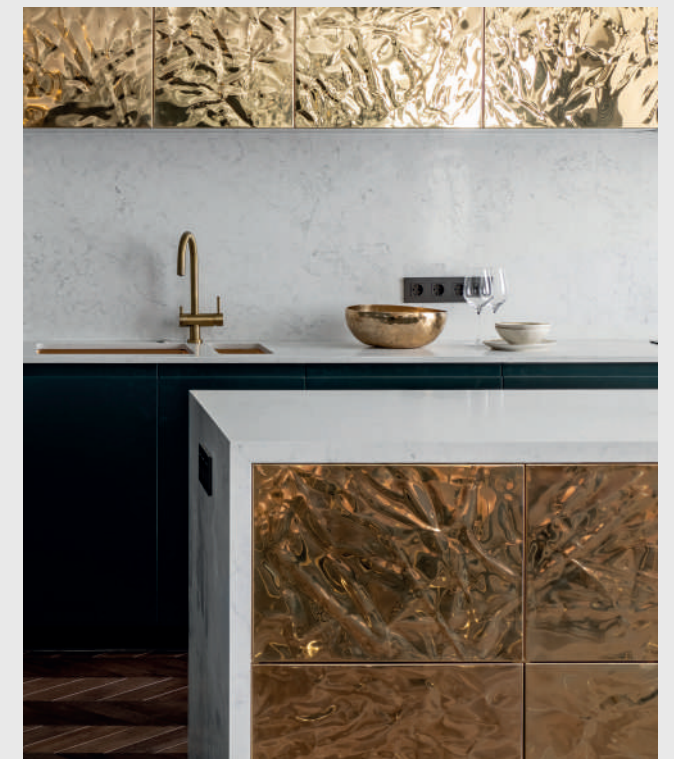

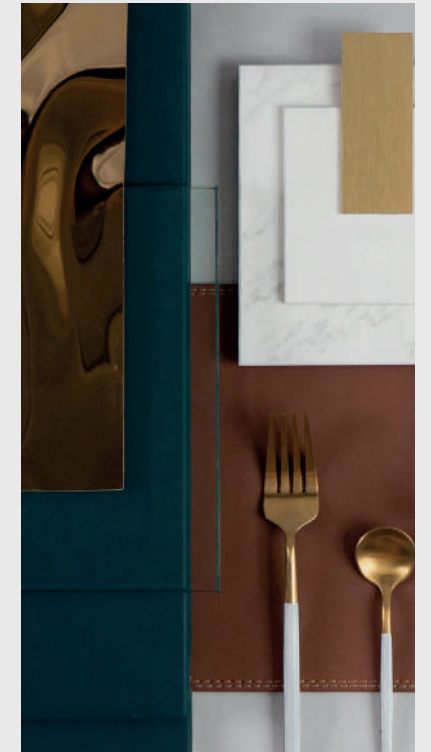

Brass Impressions

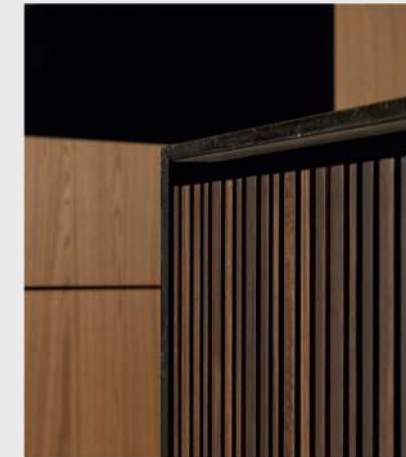

A special project in which every detail matters. Facades handmade, made in a special technique of coinage on brass are combined with facades of painted matte MDF. The island is made of porcelain stoneware and decorated with minted brass elements.

Wood[®]
Systems

Velvet Mystic

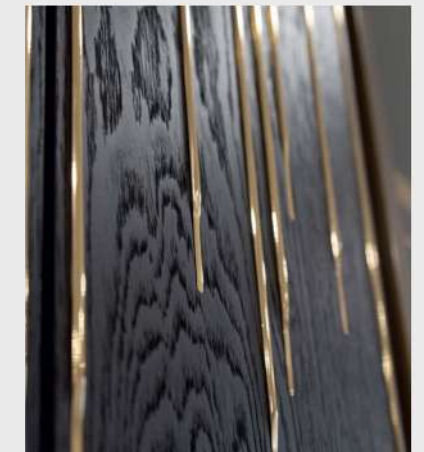

A project that emphasizes the special layout and natural lighting of the space. Matte facades are successfully combined with natural wood and emphasized by stone elements of the working surface. The design accent is an island of artificial stone, decorated with handmade wooden details.

Wood[®]
Systems

Golden Elegance

Project of unique forms and combinations. Veneered facades offer unique shapes and combinations. The veneered facades are decorated with voluminous brass inserts creating the effect of flowing gold inclusions. Glass shelves are equipped with lighting, which successfully shades the golden accents of the kitchen.

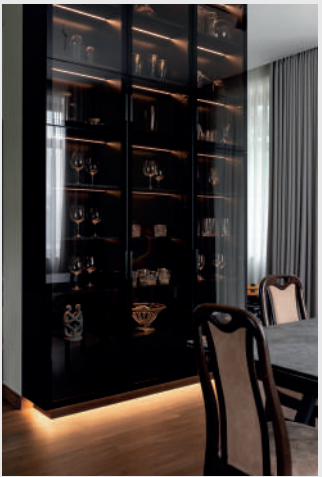

The exclusivity of the project is a special form of island made of MDF and natural marble. Brass decoration successfully combines the island with the general interior of the room.

Green Wood

Kitchen with natural accents. The central element of the project is a unique corner cabinet on a wooden island. The glass cabinet has a built-in phytolamp for fresh greenery, which shades the organic overflows of natural and artificial lighting. The facades, made of wood with glass elements, successfully emphasize the peculiarity of the project.

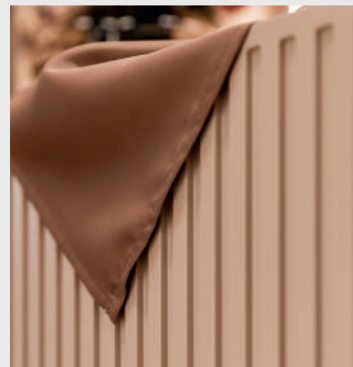

Wood[®]
Systems

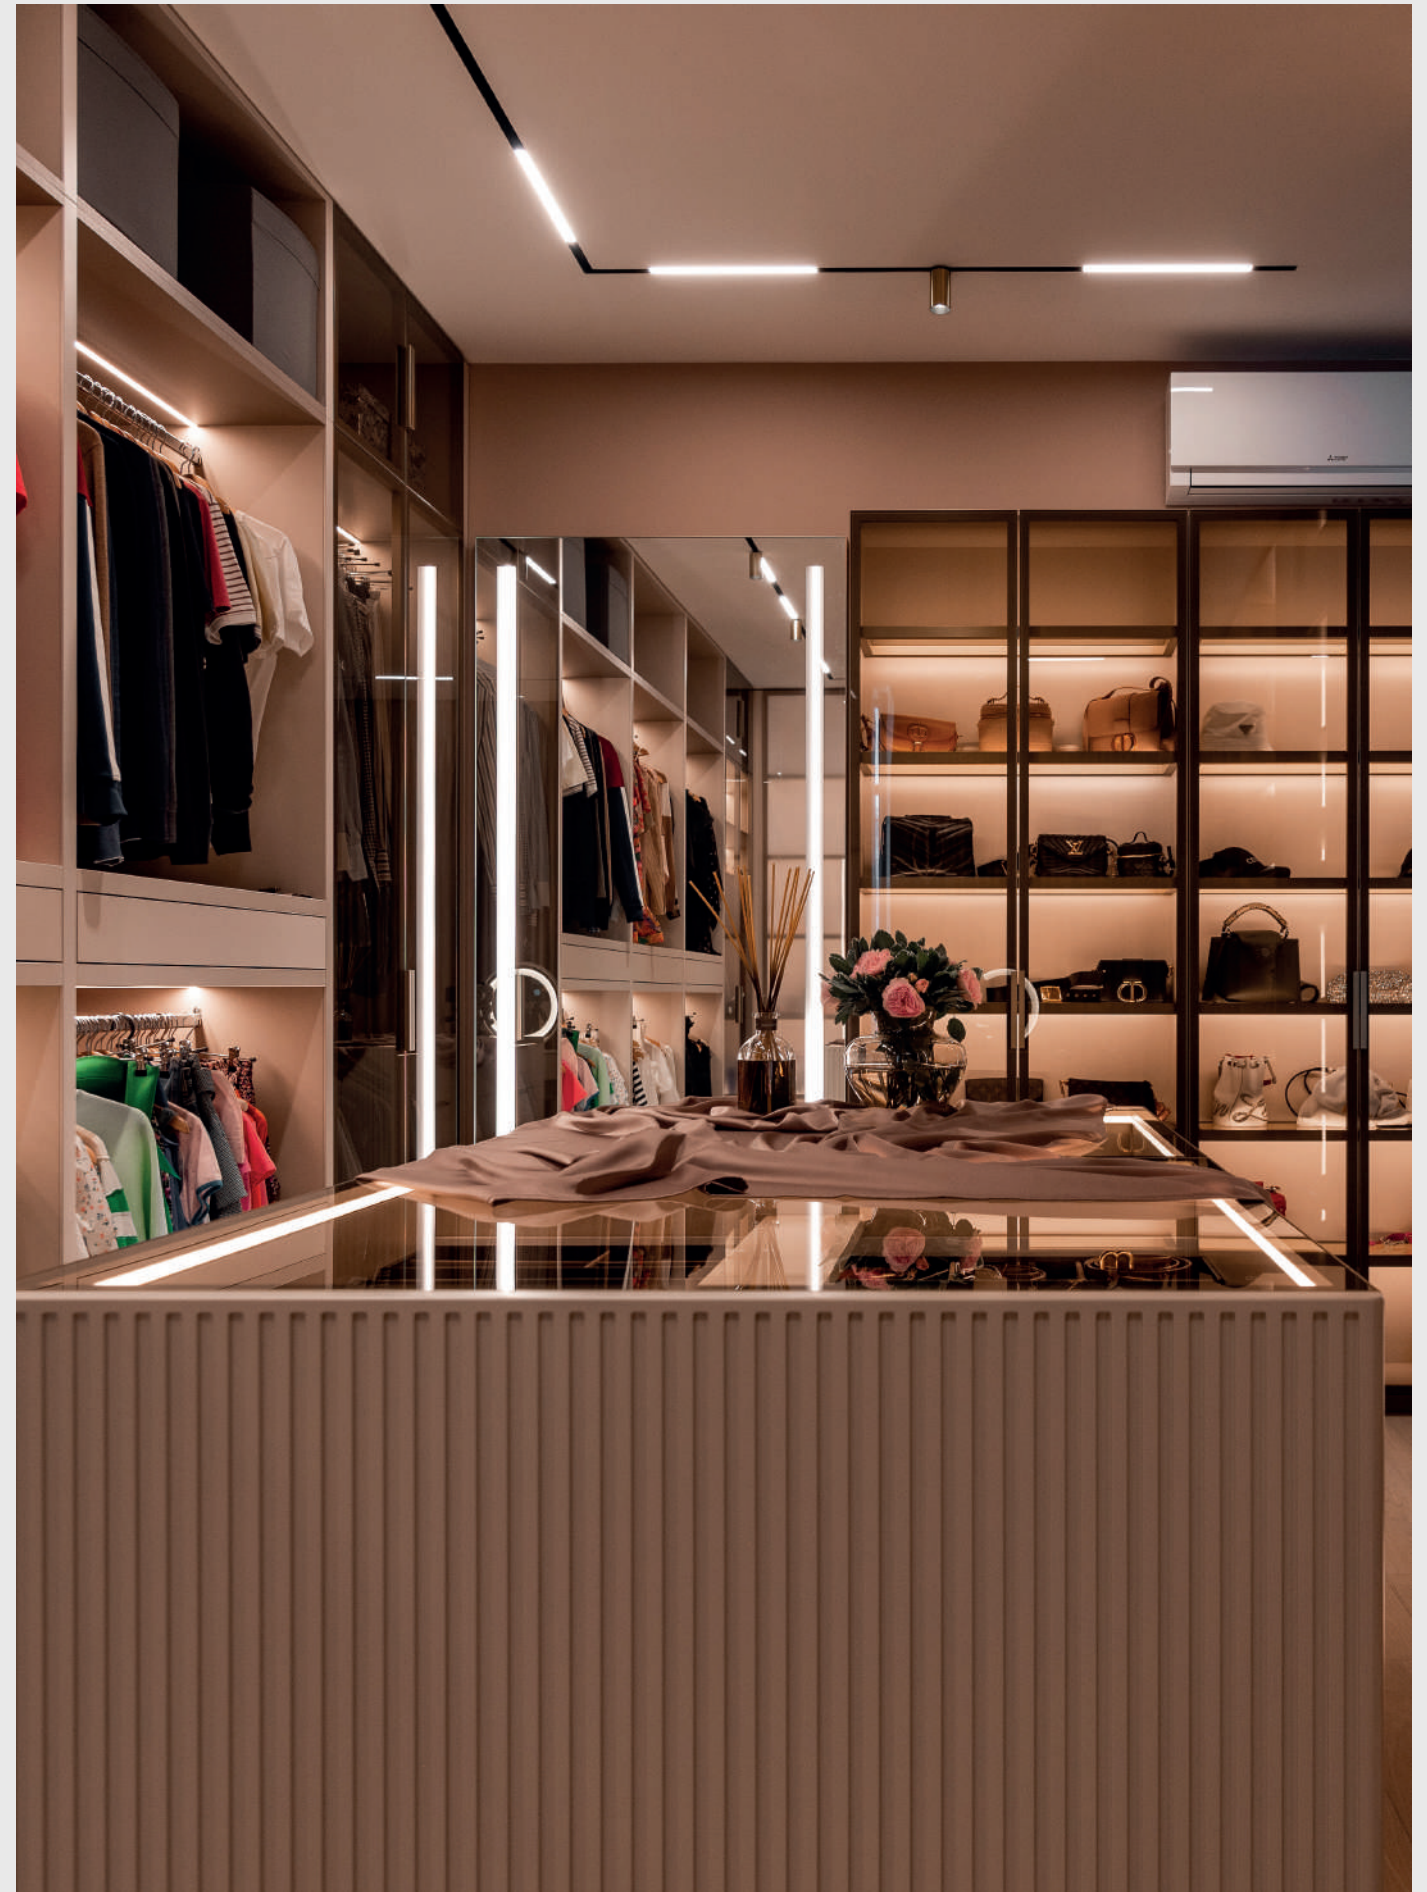

Ecclesia

The project of the dressing room is made in nude colors. General details create an atmosphere of peace and comfort. The cabinets are equipped with internal lighting, which allows you to conveniently organize the storage of things, and are decorated with metal and glass accents that add charm to the interior. The body of the dresser, which is the central element of the interior, is made of milled painted MDF, complemented by a trial and brass handles.

Wood[®]
Systems

Golden Dawn

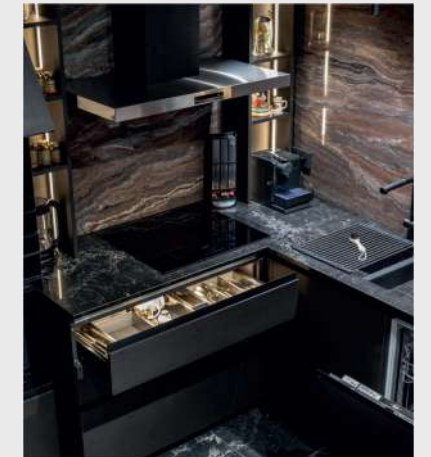

The project of light and weightless cuisine. The facades of two types are made of painted MDF and milled MDF, decorated with elements of polished brass. The island is made of quartzite and milled MDF has a special concave shape for added comfort. The island-style countertop is equipped with lighting around the perimeter.

Wood[®]
Systems

Starlight Shine

The project of a compact kitchen was created taking into account the functionality and general aesthetics of the room. The project is decorated in dark colors, with accents on stone and glass. A wine cabinet placed under the countertop makes the space more functional and convenient to use. Illumination, carefully placed throughout the kitchen, successfully combines interior elements.

Wood[®]
Systems

Silver Essence

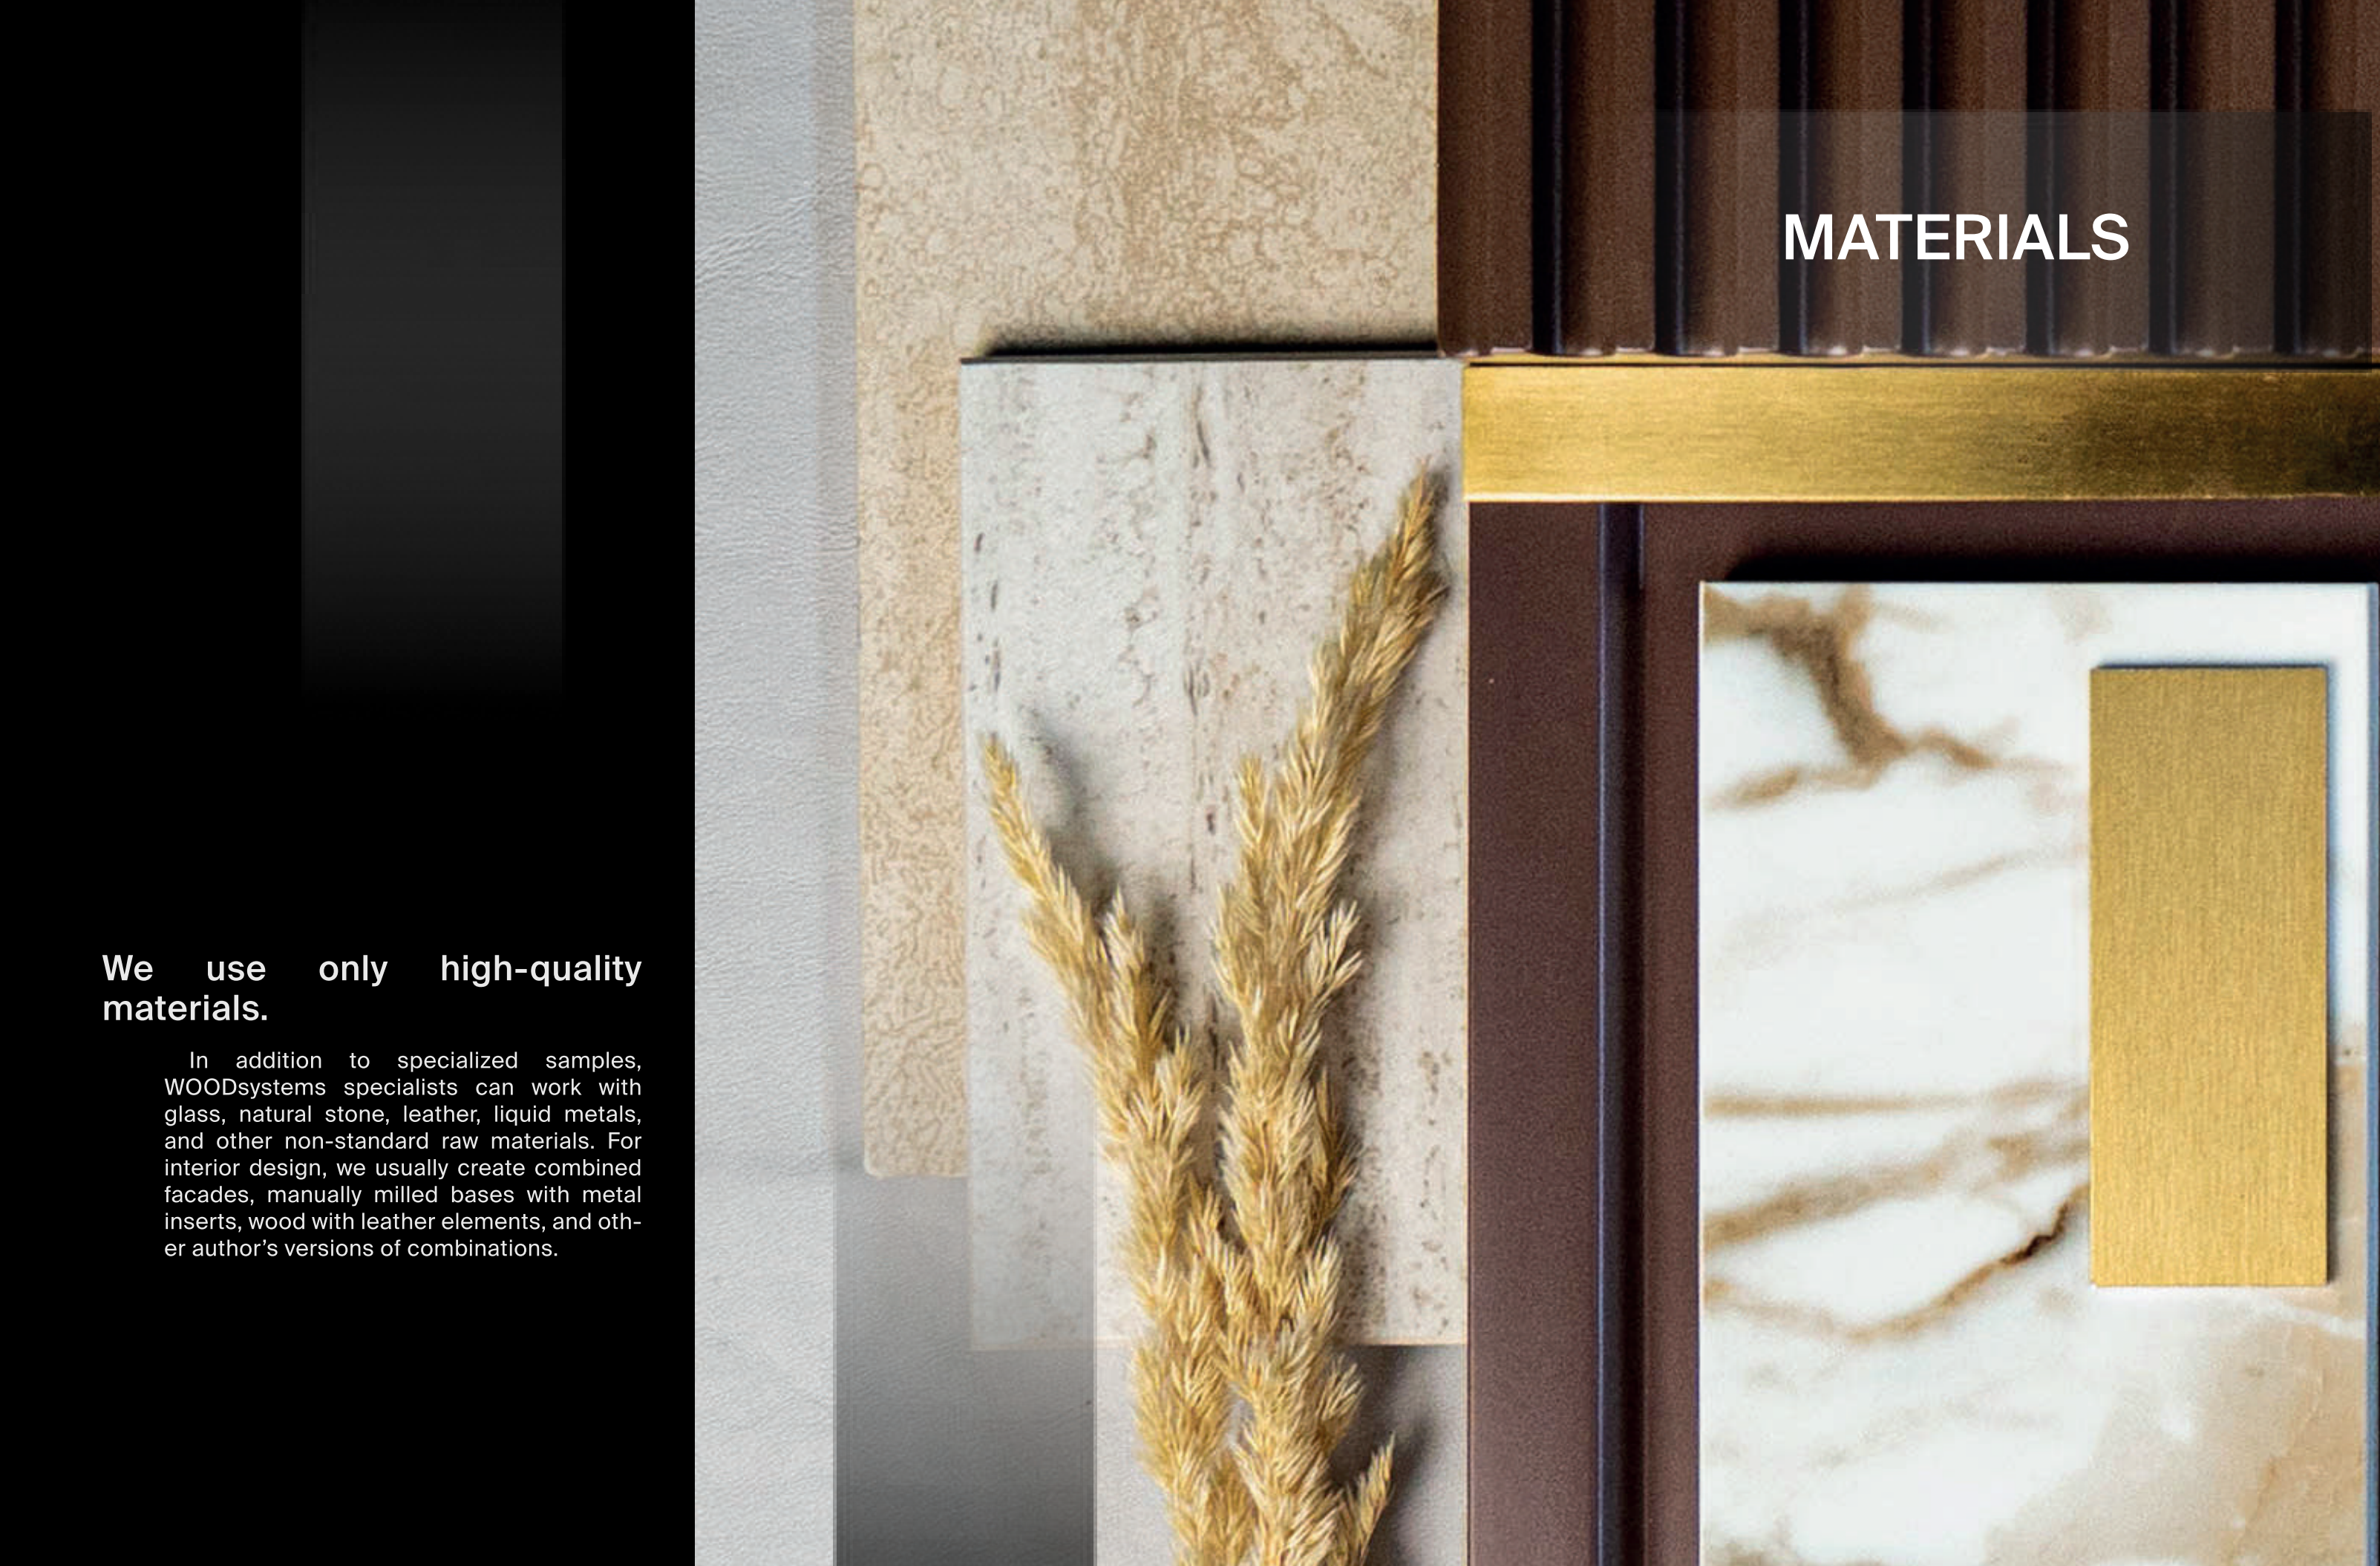

A minimalist space where every detail has its place. The project is decorated in gray tones using stone. Cold lighting of the working area and shelves perfectly emphasizes the silvery overflows of space. Open cabinets with wooden and glass details create interesting accents and add uniqueness.

Wood[®]
Systems

MATERIALS

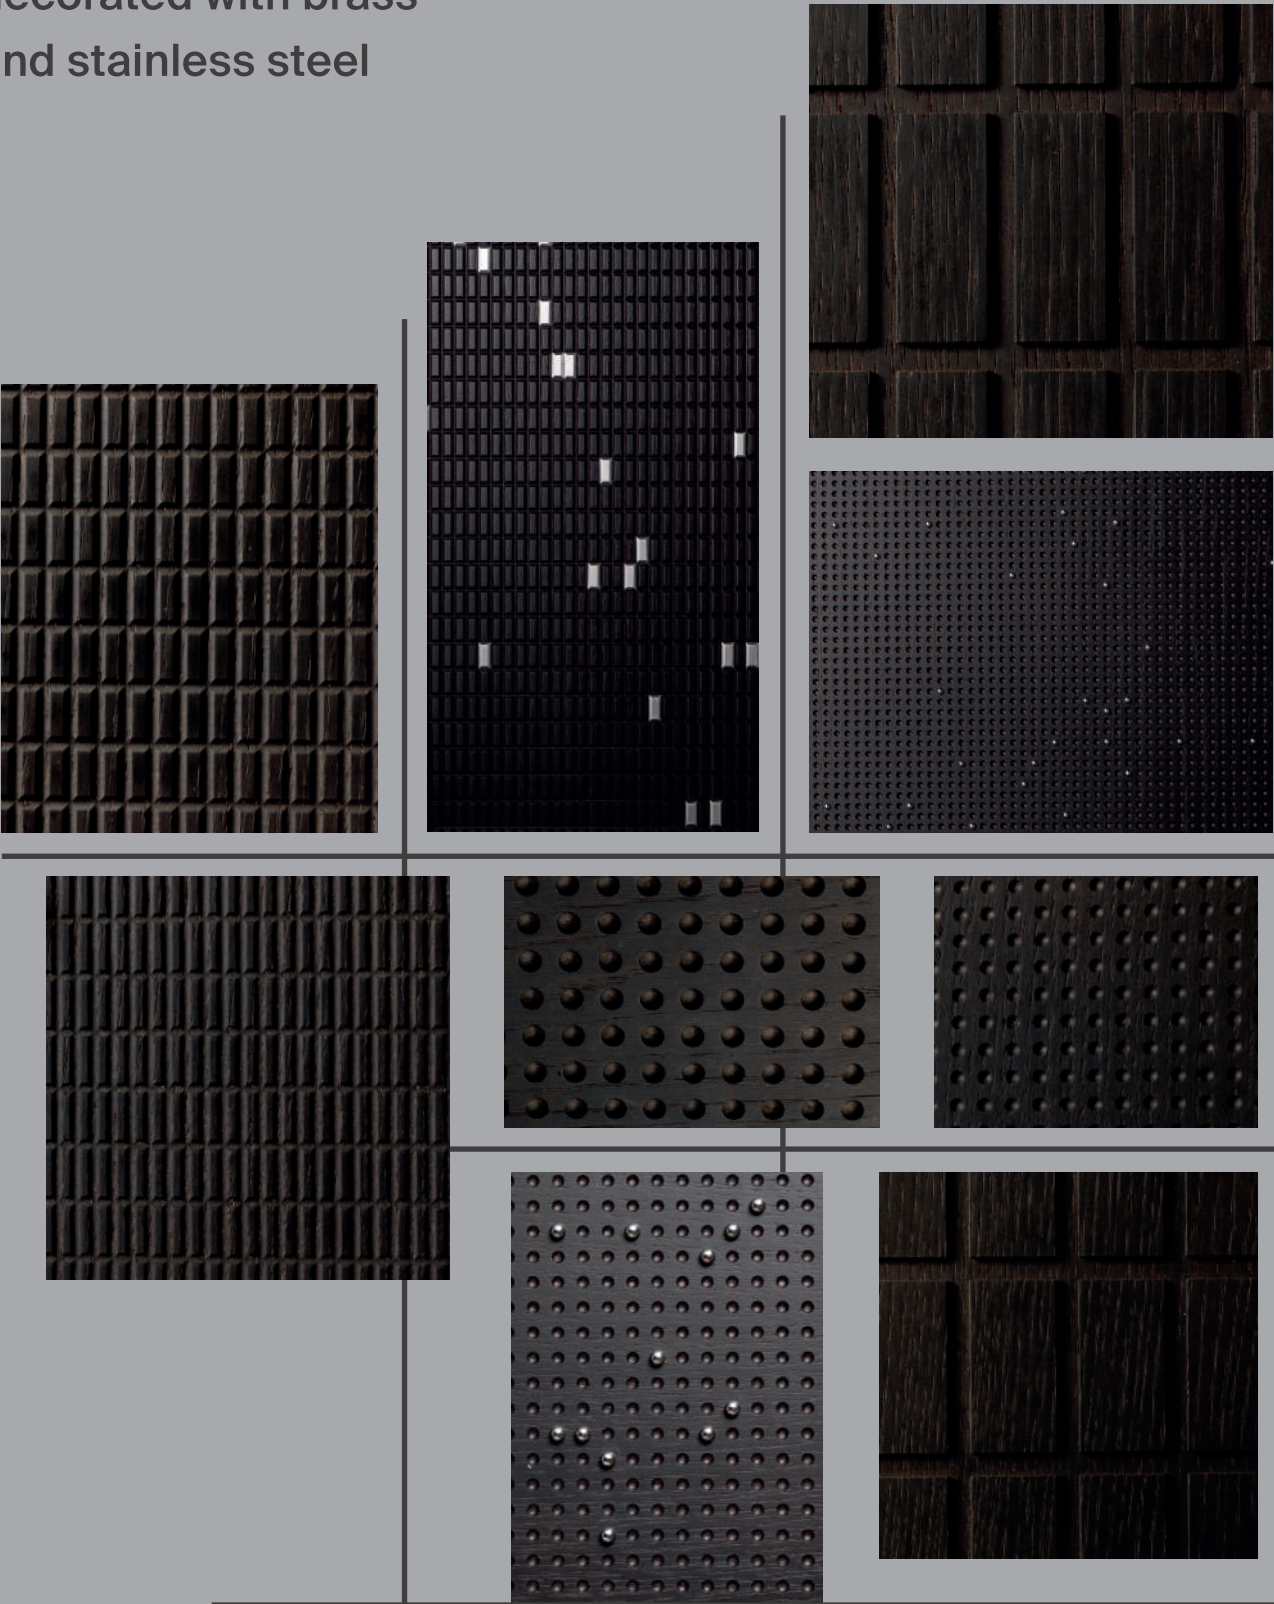

A collage of various materials including textured paper, leather, metal, stone, and dried grasses. The materials are arranged in a layered, overlapping fashion, showcasing a wide range of textures and colors from natural and industrial sources.

We use only high-quality materials.

In addition to specialized samples, WOODsystems specialists can work with glass, natural stone, leather, liquid metals, and other non-standard raw materials. For interior design, we usually create combined facades, manually milled bases with metal inserts, wood with leather elements, and other author's versions of combinations.
